Profile

With over years of experience in development, I am excited to apply my skills not only in building web applications but also in other areas. I am always willing to learn new technologies. In my spare time, I develop tools for games and do modding - it's my hobby that complements my professional path.

Experience

Reverse Engineering, Research, UX,: Mafia Hub 2022-Present

We are a team of passionate artists, designers, developers, and reverse engineers committed to delivering multiplayer modifications and tools to Mafia series games.
We provide a modding framework dedicated to multiplayer experiences for Mafia The City of Lost Heaven, Mafia 3, and Mafia Definitive Edition.
JS/TS, Angular, HTML/CSS, Docker, Deployment, Figma

Backend, Data Architecture, UI/UX, Tools: NCRP 2018-2022

Role-Play server for the game Mafia II, based on M2O.
Electron, Squirel, SQLite, MySQL, Docker, Deployment, Apache, SVN, Git, GitHub, Figma

Research, Development, Testing: M2O 2018-2022

Multiplayer modification of Mafia 2 Online for Mafia II.
C++, C, Git, GitHub, Figma

Projects
